FloraSeptic®

FloraSeptic® Wound Gel topical antiseptic helps reduce the risk of skin infections

www.FloraSeptic.com

BENEFITS OF USE

Diabetic Ulcers
Promotes healing while helping to fight infection and create optimal wound environment.

Pressure Sores
Helps overcome obstacles to healing caused by infection, alkaline pH, poor circulation, and desiccation.

Post Surgical Wound Care
Ask your doctor about FloraSeptic® for follow-up care of surgical incisions to keep them clean and healing faster.

First Aid
Upgrade your first aid for cuts, burns and abrasions – at home, at work or on the go.

The Last Word in Wound Healing

FloraSeptic® offers safe and non-irritating antimicrobial wound protection that has broad-spectrum antimicrobial properties. Its unique, patented formulation resolves pathogenic flora and helps to decolonize the wound.

FloraSeptic® facilitates removal of debris, excess exudate, and necrotic tissue fragments.
Each of the following ***essential components*** are critical for ***successful wound recovery***:

- **Reduces infection**
- **Promotes a moist wound environment**
- **Helps maintain desireable wound pH**
